Curriculum

The Master in Data Science is a dynamic, part-time program designed for professionals who want to embrace the opportunities of Big Data, AI, and Data Analytics. It combines modules on Data Management, Data Analytics, IT Management, IT Security, and Ethics and Law with hands-on projects to provide a comprehensive understanding of the theoretical and practical aspects of Data Science. The curriculum emphasizes real-world applications, enabling students to utilize the power of data in today's technology-driven landscape. With courses like Social Media & Communications and Self-Management & Leadership, the program ensures graduates are well-prepared to navigate and lead in the rapidly evolving field of data science.
